<u>NOTE :- SHAPEWAYS CHASSIS PRICES DIFFER PLEASE SEE www.shapeways.com</u>								

If you're up for building something yourself, I also have this available.

Here is a link to someone's build with one.....

<https://www.slotforum.com/forums/index.php?showtopic=185009>

Below are details of my universal, adjustable wheelbase **FLEX chassis**.

Using technology to enhance traditional methods of scratch-building, my take on an adjustable universal chassis to give scratch builders and car converters another option to choose from.

Designed of course for the equally versatile Slot.It inline motor mounts, the modular chassis is 42mm wide and can be adjusted to suit the required wheelbase by cutting down the front section.

2 'pre-packed' versions available, however kits can be tailored to suit (please enquire).

FLEX 1 accepts unmodified motor mount. Wheelbase 104-76mm by trimming the front end section, up to 70mm can be achieved by trimming of the main part also.

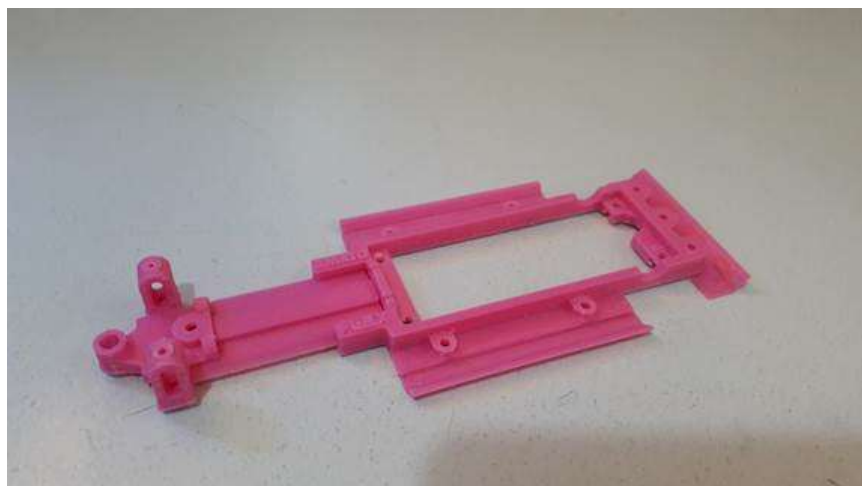

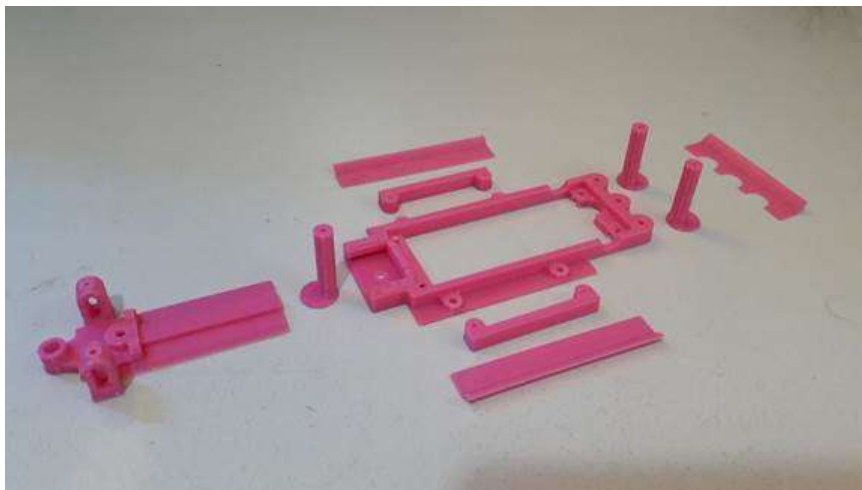

FLEX 2 front of slot.it pod is cut down and my new cross member is glued to it to relocate the front pod mounts to the side. Wheelbase is 97-67mm by trimming the front end section, up to 63mm can be achieved by trimming the main part also.

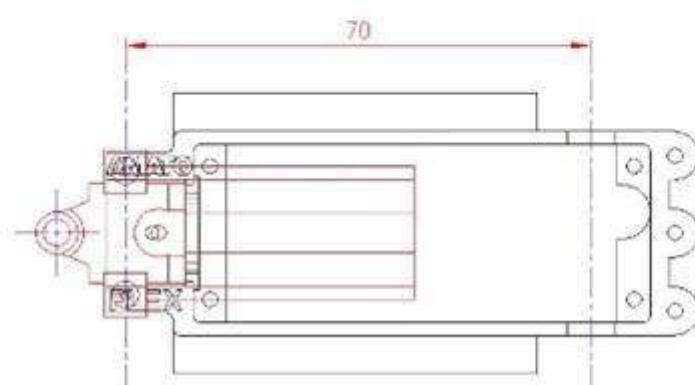

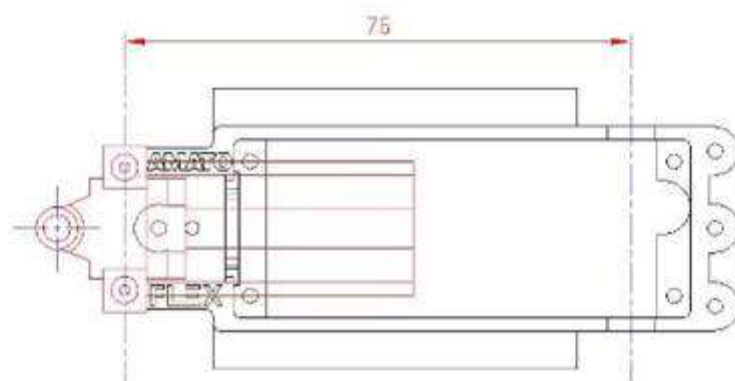

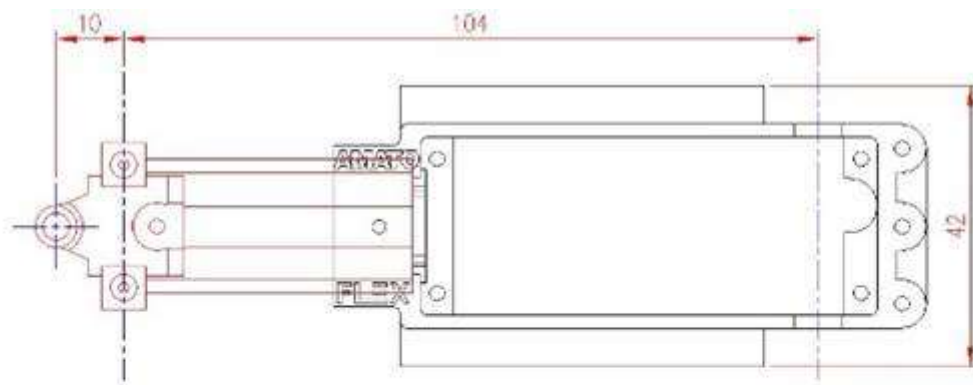

Both have side and traditional post mounting options (posts and side mounts supplied)

Side and rear chassis pans supplied to complete the build.

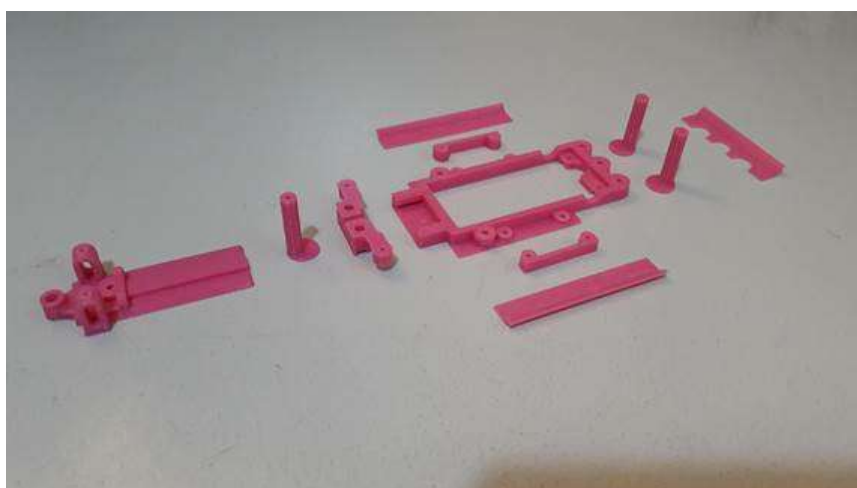

Front end options widths available also with adjustable axle ride height.

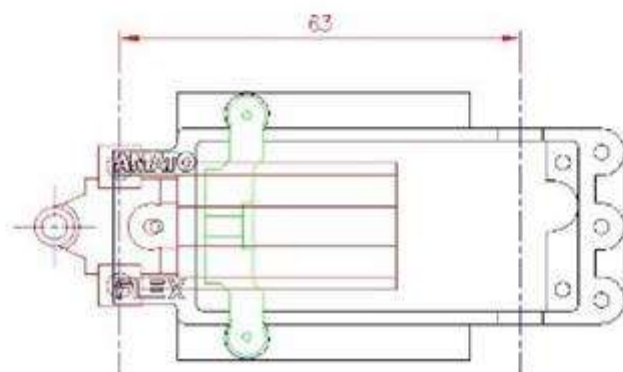

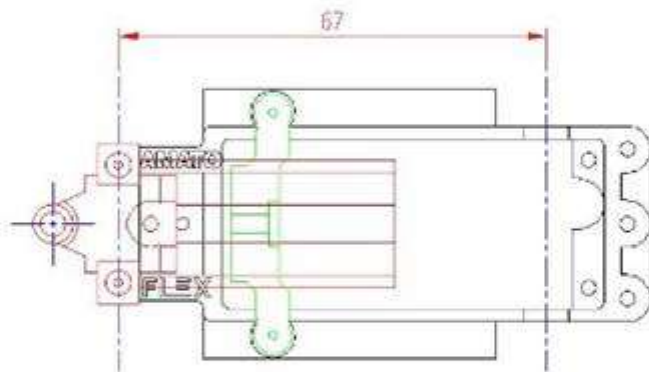

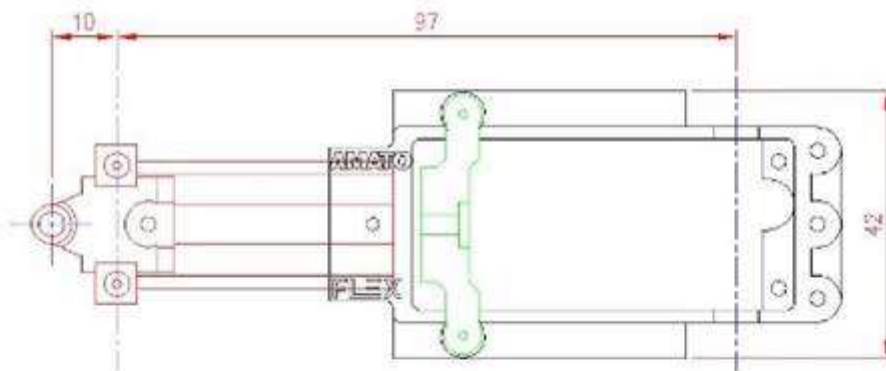

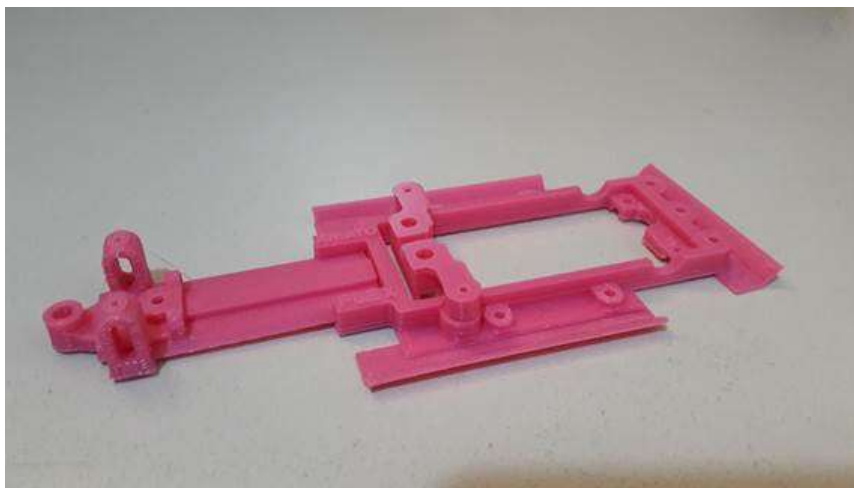

FLEX 1 KIT

FLEX 2 KIT

3D Printed slot car parts		
Part	Description	£
Body mounting posts	Mushroom shape, various lengths	0.5
WASP Motor pod - S-can	clam-shell' type pod. Suitable for standard classic Scalextric running gear	5
Wide arches	Various sizes and shapes, set of 4	3.5
Body side mounts	Alternative body mounting option, pair	1.5
F1 mirror/steering wheel	Replacement part for some 80's Scalextric F1 cars	1
Rear spoiler	Universal, various types	1.5
Wheel inserts	various, set of 4	1.5
Tyre savers/stands	adjustable, fits to rear axle	2
Car ramps	Track scenery item, pair	2
Scalextric F1 spoiler	As used on UOP Shadow/BRM P160	2.5
BRM P160 intake	air intake on engine	1.5
UOP Shadow intake	air intake on engine	1
Clubman front grill	with or without bumper	1.5
PCS type chassis parts		
Front ends	Longer length (custom lengths available) Axle height adjustment (with grub screws - not included) Standard or Extended guide position options Various widths - 15,20,25,30mm	3.5
Side pans	For fixing to side of chassis to provide a place for weight to be added, pair	1.5
Amato FLEX chassis		
Adjustable INLINE chassis.....	Main part Adjustable front end Body posts Side body mounts Side and rear pans	
Amato POLICAR front chassis sections	Various, please enquire	3.5
